## **2. Disability Variance.**

The Board of Appeals may grant a variance to an Owner of a dwelling for the purpose of making that dwelling accessible to a person with a disability who resides in or regularly uses the dwelling. The Board shall restrict any variance granted under this provision solely to the installation of equipment or the construction of structures necessary for access to or egress from the dwelling by the person with the disability. The Board may impose conditions on the variance, including limiting the variance to the

duration of the disability or to the time that the person with the disability lives in the dwelling. For the purpose of this provision, a disability has the same meaning as a physical or mental handicap under the Maine Human Rights Act and the term "structures necessary for access to or egress from the dwelling" is defined to include railing, wall or roof systems necessary for the safety or effectiveness of the structure.

**Please answer the following questions to explain why you believe that the subject property meets each of the following criteria for this type of variance:**
